

# LightHub Mobile App Test Result Report

## Tester team

Full name	Position	Reporting role
Valeryia Titova	Tester Software	Tester Manual

## Testing process description

The Light Hub mobile application Version 1.0.0 has been successfully tested on Android 8.1.0. Critical Path Test and Advanced Test were made by manual.

## Summary

The application works, but in many modules critical bugs were found that interfere with the work in the mobile application. 15 bugs were found, 10 of them were bugs with the importance level "high".

## Testing timetable

Full name	Date of work	Description	Duration
Valeryia Titova	06/04/2020	Preparation of a test case, bug report and test result report	8 h

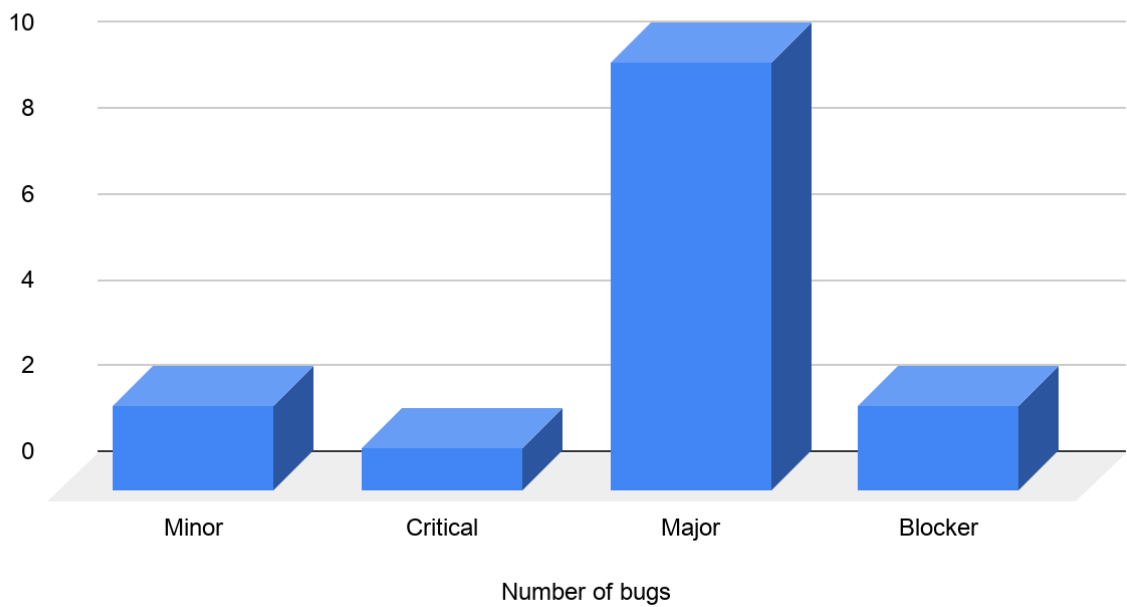

## Recommendations

The state of the mobile application is unsatisfactory. There are 2 bugs blocking work with the mobile application and one critical bug. It is necessary to fix the bugs found, especially with the "high" status of Severity.

# Bugs statistics

Severity	COUNT
Blocker	2
Critical	1
Major	10
Minor	2
Total	15
